PROFESSIONAL SUMMARY

Senior Product Analyst with 8 years across gaming, analytics, and platform systems, transitioning into Product Management. Founding team member at a Series A gaming startup, acting as product manager and owning the product function end to end, from PRDs and AI prototypes to prioritization and GTM. Strong background in experimentation, monetization strategy, and scalable system design across global game portfolios exceeding 5M+ DAU and \$45M+ in annual revenue. Skilled in product vision, PRDs, prioritizing tradeoffs, and shipping MVPs in founder-led environments.

EXPERIENCE

Senior Product Analyst
Liquidnitro Games

May 2024 - Present
Hyderabad, India

- As acting product manager, owned the product function end to end at a Series A gaming studio, working with a cross-functional team across engineering, design, data and AI.
- Authored the PRDs, feature specs and UX requirements, and owned prioritization and tradeoff decisions across sprints.
- Built functional prototypes with AI to validate concepts before engineering committed to them.
- Established the studio's founding data function as its first data hire: competitive analysis, player insights and business intelligence for leadership.
- Partnered with the founders on client pitches, GTM strategy and business development.
- Product lead on the internal product tech team through its early growth, contributing to hiring, onboarding and early org structure.

Product Analyst
Electronic Arts (EA)

Dec 2021 - Apr 2024
Hyderabad, India

- Owned end-to-end analytics for 5+ highly engaged mobile titles across the Bejeweled, Plants vs. Zombies, Need for Speed No Limits, and The Sims Mobile franchises, supporting EA's broader live-services portfolio (5M+ DAU, \$45M+ annual revenue).
- Drove feature ideation and pre- and post-production analysis, contributing directly to \$500K+ in incremental revenue.
- Built and maintained 50+ dashboards spanning user acquisition, retention, engagement, ad monetization, and root-cause analyses used by cross-functional leadership.
- Led A/B test design, implementation, and post-analysis across multiple live titles; developed and deployed telemetry ensuring precise, reliable data collection portfolio-wide.
- Ran analytics for the Ad Monetization team across multiple titles, tracking network trends, detecting anomalies, and conducting deep-dive performance analyses.
- Partnered with Producers, PMs, Designers, Developers, QA, and Marketing to keep live operations running smoothly; designed onboarding curriculum and mentored 3+ analysts.

Decision Scientist
Mu Sigma

Oct 2018 - Nov 2021
Bangalore, India

- Delivered forecasting, optimization, and predictive analytics for Fortune 100/500 clients.
- Built executive dashboards and models supporting strategic decision-making across business units.
- Improved data pipeline reliability, reducing operational errors by 70%.
